REMARKS

This amendment is submitted in response to the outstanding Official Action mailed November 16, 2006. In view of the above claim amendments and the following remarks, reconsideration by the Examiner and allowance of this application is respectfully requested.

Claim 75 – 78, 80, 82, 84, 88 – 91, 93, 95, 99 – 102, 104, 106 and 108 have been amended to more particularly point out and distinctly claim the subject matter that Applicant regards as the invention. In particular, Claim 75 has been amended to replace the suggestive limitations with positively recited method steps that are required to be performed, so that Claim 75 is now directed to *creating* a third party account linked to a fund depositor's bank or credit card account using information entered by the fund depositor with a personal computer, *programming* with a personal computer a periodic and automatic transfer of funds into the third party account from the fund depositor account, *encoding* a magnetic card with third party account information permitting cash withdrawals or fund transfers as payments for goods and services, and *issuing* the magnetic card to the son or daughter of the fund depositor. No new limitations have been added. This is a re-writing of Claim 75 that does not introduce new matter. Claims 88 and 99 have been similarly re-written without adding new matter to incorporate two or more of the foregoing limitations.

Claims 75, 82, 84, 95, 99, 106 and 108 have been amended to clarify that the information being supplied refers to the information previously stored. This refers more precisely to the language of a previous claim to address rejections for lack of antecedent basis
